

Project 1: To-Do List Application

Objective

The objective of this project is to create a simple To-Do List application using Python. The program allows users to add tasks and view the stored tasks.

Tools Used

- Python
- Visual Studio Code

Description

This application helps users manage their daily tasks. Tasks are stored in a list and displayed whenever required.

Algorithm

1. Create an empty list.
2. Display menu options.
3. Take task input from the user.
4. Store the task in the list.
5. Display all tasks.
6. Exit the program.

Result

The program successfully adds and displays tasks entered by the user.

Conclusion

This project helped in understanding Python lists, loops, and basic user interaction.
